## PROFILE

I'm a cybersecurity student with real experience teaching remotely and adapting lessons for different learners. I work with Python, C, and Rust, have a foundational base in web development, and enjoy designing secure systems. I am mostly interested in the Blue Team in the Cybersecurity Field, mostly with Digital Forensics. I've handled data annotation and AI training tasks to help build reliable machine learning datasets. I'm always looking for new ways to bring fresh ideas to education and technology, confident in the blend of technical and creative skills I offer.

## PROFESSIONAL EXPERIENCE

**Ujjwal Shishu Niketan Academy**, *Part Time Teacher*
